DEFRA  
APPROVED

The Avalon range are also approved by DEFRA, the Department for the Environment, Food & Rural Affairs. This means all our stoves are permitted for use in Smoke Control areas as levels of particle emission are so low.

OPTIONS

OPTIONAL FLUE  
GATHER BOX

For rear flue installations with limited space.

OPTIONAL FLUE  
DAMPER

This allows a greater controllability on the flue draw (if necessary).

WOODBURNING  
AND MULTIFUEL

All our Avalon stoves are available as a multifuel model as standard, however there is also a wood burning option available.

HANDLES

All stoves in the Avalon range are available with either stainless steel or black handles and matching control knobs.

# T

TRIPLEBURN®  
TECHNOLOGY

**CLEANBURN**, our innovative technology is not only better for the stoves it's also better for the environment.

The idea behind Cleanburn is to maximise combustion, so that more fuel is burnt and less is turned into deposits in the stove, chimney or atmosphere. Our Avalon stoves have been proven to have lower emissions, which makes them among the most eco-friendly models on the market.

## NO NEED TO SCRUB THE GLASS DOOR

Hot Airwash Technology does the work for you. A 'Secondary Air' wash maintains a stream of air between fuel and door, reducing the build-up of carbon deposits on the glass.

## OPTIMUM WOODBURNING CONDITIONS

The Tripleburn® technology improves the ignition of the fuel, with a jet of air directed into the heart of the fire. When the grate is in the closed position it creates a flat base, it allows a deep bed of ash to build up – these are the optimum conditions for burning wood.

## OPTIMUM SMOKELESS FUEL BURNING CONDITIONS

When burning smokeless fuel the grate is moved to the open position by a single turn of the handle. 'Primary Air' is then directed under the open grate and into the heart of the fire, ensuring a clean, efficient burn.

'Tertiary Air' re-ignites the un-burnt gases ensuring a cleaner burn.

## TRIPLEBURN® TECHNOLOGY

The three streams of air cause an incredibly efficient burning of the fuel, which results in an increased heat output, less smoke and a cleaner environment. See diagram on previous page.

## FROM WOOD TO MULTIFUEL WITH A SINGLE MOVEMENT

The integral grate in the Avalon range can be changed from wood setting to multifuel, with the cold-handled riddling tool.

## DUST FREE, SAFE AND EASY RIDDLING

By simply moving the riddling tool backwards and forwards, the stove riddles safely with a minimum of effort. This is undertaken with the doors closed and is completely dust free.

## INTERCHANGEABLE FLUE OUTLETS

All the single-sided free standing stoves in the Avalon range can be flued from either the top or the rear of the stove.

## EASY ACCESS FOR CHIMNEY SWEEPING

The stoves feature a removable throat plate, giving full and easy access for sweeping the chimney\*.

## INTERNAL LINING SYSTEM

The internal lining system maximises the firebox temperature, ensuring complete combustion.

## COLD-HANDLED RIDDLING TOOL

The cold-handled riddling tool can be used for opening and closing the doors, riddling the grate, grate adjustment and easy removal of the ash pan.
