## Installing the Multi-Fuel Extension into the stove

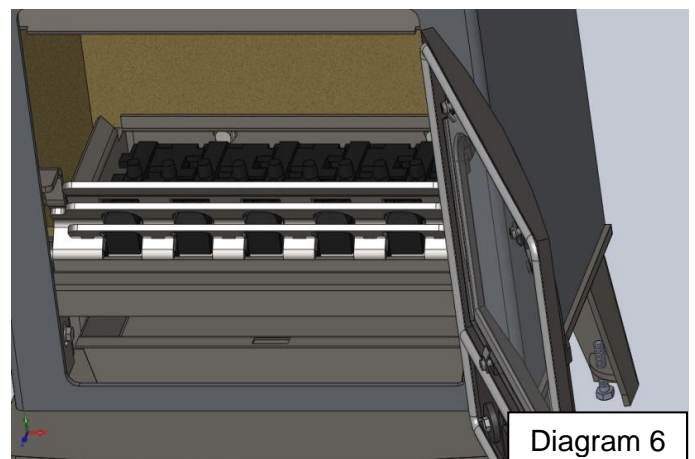

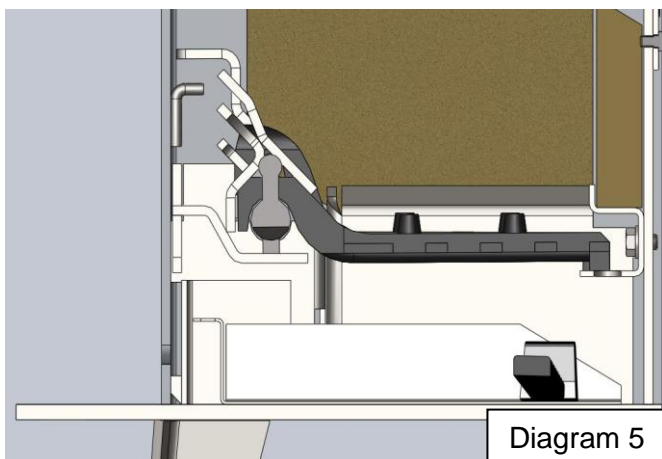

Ensure the orientation of the Multi-Fuel Extension is correct as shown in Diagram 1. Open the Stove Door(s) and remove the Baffle. \*The example shown is a Consort 05 Compact, Single Door. Other models may vary.

Fit the Multi-Fuel Extension as shown in Diagrams 2, 3, and 4.

Once in position, with the Multi-Fuel Extension's end tabs touching the inside face of the Stove, it can be lowered onto and between the Grate Bars as shown in Diagrams 5 and 6.

The Baffle can now be replaced.
